Model Overview

Steris 3085 SP

The Amsco® 3085 SP Surgical Table is a highly flexible surgical platform that provides versatility for every surgical specialty. It assures complete flexibility for patient positioning, no matter how difficult the procedural or imaging requirements. The 3085 table is designed for ultra-precise articulation, exceptional access to the patient, and superior fluoroscopic imaging of any part of the anatomy. A full complement of accessories is available to complete the positioning of surgical patients for virtually every general, specialty and traction surgical procedure.

Steris Cmax 4085

The STERIS Cmax/4085 General Surgical Table is a highly versatile general surgical table that is electro hydraulically operated. It is designed to support all general and bariatric surgeries including nephrectomies and cardiac, vascular, endoscopic, gynecologic, urologic, ophthalmologic and orthopedic procedures (with the addition of Table accessories). Other features include Auto Limit Sensors, Back up Hand Control, Intellipower-Battery, Main Power Modes, Battery Level Indicator.

Steris 5085 SRT

The 5085 SRT is a crossover table that slides, rotates and transports patients throughout the perioperative area and is the only surgical table cleared by the FDA for patient transport, according to the company. A drive wheel allows one caregiver to safely transport a patient from pre-op to OR to post-op without red zone gurneys or trolleys. In pivot mode, the drive wheel locks and rotates 360 degrees, without support posts or weight calculations. An intuitive hand control with an LCD window telegraphs table-positioning data and allows one-touch patient posturing. The four-section tabletop articulates to a variety of patient postures. Both tables are configured to enable ACT (Advanced Control Technology) software and are compatible with previously purchased STERIS accessories.

Key Features

Steris 3085 SP

Automatic conversion of functions for reverse patient positioning, regardless of headrest location means commands are automatically interpreted according to the selected orientation.

Bieri hydraulics provide ultra-precise tabletop articulation for specialties such as urology and neurology. Tabletop movement is smooth and accurate through the full range of positions.

With the addition of the orthopedic extension, the AMSCO 3085 SP surgical table pulls traction and provides positioning flexibility for hip and lower extremity orthopedic procedures.

Steris Cmax 4085

Provides outstanding access for C-arm, permitting high quality images crucial to cardiothoracic, orthopedic and neurosurgical procedures

Contours to virtually all patient postures with four section tabletop

Radiolucent 18" sliding top for total body imaging

Steris 5085 SRT

Provides outstanding access for C-arm, permitting clear high-quality images crucial to MIS, cardiothoracic, orthopedic and neurosurgical procedures

Accommodates virtually all patients with generous weight and height ranges

Radiolucent 18" sliding top
