

Stryker has raised the bar for medical imaging video display with the introduction of the Vision Elect HDTV Flat Panel Monitor. The Vision Elect HDTV is the ideal complement to the 1188 HD 3-Chip Camera.

This 26" display provides clear, brilliant images on a spacious, widescreen display. Offering both 4:3 and 16:9 aspect ratio display formats, improved color reproduction and new picture-by-picture capabilities, this high definition platform is designed to create the optimal operating environment for the surgeon.

Features

- HD and HDTV native outputs
- Progressive Scan Displays
- Lightweight displays for superior flexibility
- New ergonomic interface allows consistent operation under any OR condition
- Digital & analog inputs for seamless integration with any existing system
