

The **Radiance**® Series is the most advanced, high-definition (HD) medical imaging system for Minimally Invasive Surgical (MIS) and interventional procedures. It incorporates NDS' proprietary Advanced Image Processing (AIP) technologies providing a unique multi-modality platform for simultaneous processing of images from different sources – endoscopic camera, fluoroscope, ultrasound, or any other – resulting in unprecedented accuracy, efficiency, and collaboration for operating and clinician teams.

## Features

- Unsurpassed color reproduction for clear identification of anatomy in even the most demanding circumstances.
- Improved Digital Processing for a truly digital video system.
- High resolution, Fine detail, IPS screen.
