

The **Accuvein Av300** is a portable handheld device designed for medical professionals to locate specific peripheral veins. It is meant to supplement medical training and experience, not replace them. While accurate, it should be used alongside clinical judgment for vein location during procedures like venipuncture. The Av300 is versatile for various situations requiring peripheral vein detection.

## Features

- **Infrared light technology:** Utilizes infrared light to detect veins beneath the skin.
- **Vein Illumination:** Projects the positions of veins directly onto the skin's surface for easy identification.
- **Qualified Medical Assistance:** Assists qualified medical personnel in locating appropriate veins for venipuncture.

## Specifications

### Dimensions

**Height:** 7.9" (20 cm)  
**Width:** 2.4" (6 cm)  
**Depth:** 2" (5 cm)  
**Weight:** 9.7 oz. (275 grams)

### Water Ingress

IPX0 (no water protection)

### Battery

**Battery:** AccuVein BA300 user replaceable Li-Ion 3.7V, 2,400 mAh  
**Life time:** 2 hours of continuous run time on full charger.  
**Power Supply:** PS310

### Operating Conditions

**Temperature:** 39°F to 104°F (4°C to 40°C)  
**Humidity:** 5% to 85% RH non-condensing

### Transport Conditions

**Temperature:** -4°F to 122°F (-20°C to 50°C)  
**Humidity:** 5% to 85% RH non-condensing

### Storage Conditions

**Temperature:** -4°F to 122°F (-20°C to 50°C)  
**Humidity:** 5% to 85% RH non-condensing
