HEWLETT PACKARD® 8041A ANTEPARTUM FETAL MONITOR

- Portable Fetal Monitor with Toco and Ultrasound Transducers

Typical Manufacturer’s Picture

Specifications

Designed specially for antepartum applications. The heart rate record obtained from the microprocessor using autocorrelation technique has been proven to be clinically accurate.

Used for monitoring high risks pregnancies, which also includes twins. In addition to monitoring the fetal heart rate, it also monitors the maternal heart rate. A built-in recorder automatically prints readings.
