

This **Bariatric Extension Package** increases the width of your Cmax table to a full 28" to accommodate bariatric patients. Order either the width extender and the pad together (BF643-BF651) or order pads only (BF652-BF659) to change the height of your existing pad/extension set.

Features

- Increases original table width by a total of eight inches.
- Wider patient positioning.
- Rated for use with patients weighing up to 1000 pounds. (Make sure to verify the patient weight capacity of the surgical table model to which they are applied).
