

The **Haemonetics Cell Saver 5+** is an autotransfusion system that is used to salvage red blood cells during and post surgeries, during procedures where there is a large amount of blood loss. It can also be used before surgery to collect platelet-rich plasma. The Cell Saver 5+ salvages whole blood, washes it, and packs it to be later infused into the patient. This process is called autologous transfusion. The CS5+ helps reduce the amount of unnecessary allogeneic transfusions. Soma Tech Intl technically and cosmetically refurbishes Haemonetics Cell Saver 5+ autotransfusion systems in their own ISO:13485 certified facility and is not affiliated with Haemonetics.

Features

- Salvages red blood cells.
- Can be used to collect platelet rich plasma and platelet poor plasma.

Specifications

Dimensions

Machine alone (pole down) Size: (H x W x D) 37 in (94 cm) x 16 in (40.6 cm) x 14.5 in (36.8 cm)

Machine (pole extended) Size: (H x W x D) 74.5 in (189.2 cm) x 16 in (40.6 cm) x (36.8 cm)

Weight of machine: 71 lb (32.2 kg)

Weight of cart: 35 lb (15.9 kg)

Electrical

Electrical voltage: 100/220 VAC (\pm 15%), switchable

Pump speed: 0-1000 mL/min (adjustable)

Centrifuge speed: 2050-5650 rpm (adjustable)

Fuse rating: F 2.5 A / 250V

Operating frequency: 47-63 Hz

Power cord length: 16 ft (4.9 m)

Certifications; UL Listed
