

The **Hepcon HMS Plus** introduces new features to your Hemostasis Management System. The HMS System is an easy to use, versatile machine that can be used to perform a variety of tests for anticoagulation. The Medtronic HMS System is considered to be a standard in the clot- detection technology. with newer technology added to the system it now has a bar code scanner and external data management capabilities.

Hemostasis Management is crucial and can easily be achieved with the use of the Medtronic Hepcon HMS Plus system, making it ideal for your operating room.

Features

- Fewer complications associated with excessive blood loss
- Preservation of the coagulation system, resulting in fewer transfusions
- Fewer surgical reoperations, thus decreasing associated costs

This multi-purpose, intuitive system easily performs in-vitro diagnostic procedures in the:

- operating room
- catheterization lab
- clinical lab
- intensive care unit
- emergency room
- anywhere STAT coagulation testing is important to successful medical treatment

Specifications

Dimensions

Height: 40 cm (15.75 in)

Depth: 38 cm (15 in)

Width: 33 cm (13 in)

Weight: 15.47 kg (34 lbs)

Environmental

Operating temperature: 14°C to 32°C (57°F to 90°F)

Storage temperature: 0°C to 49°C (32°F to 120°F)

Operating humidity: 10% to 90%, noncondensing

Storage humidity: 5% to 90%, noncondensing

Power

Voltage: 100 - 240 V ~ Single Phase

Frequency: 50-60 Hz

Maximum Current: 1.2/0.6 a (100-120/200-240)
