## Hotline HL-1200A Rapid Infuser

The Hotline HL-1200A rapid Infuser is a fluid warmer with pressure chambers and air detection. The liquids, Iv fluid or blood is warmed through a heat exchange. The Pressure chamber applies pressurization to the fluid which causes the flow rate to increase. With the disposable tubing of the-1200A infuser, the flow rate can go from 30 ml/min to 1100 ml/min, the maximum rate is 1400 ml/min. The temperature of the fluid going through thwarter can range from 36 - 40 degrees depending on the infusion rate. The gas vent filter is designed to remove microbubbles of gas from the line that results from the IV fluids being heated.

# Features

#### **Automated Pressure Chambers**

- Mounted pressure chambers allow fast and easy bag changes.
- Accommodate standard blood and crystalloid bags.
- On/Off toggle switch automatically pressurizes chambers to a constant pressure of 300 mmHg

#### Heat Exchanger

- Aluminum heat exchanger transfers heat 1000 times faster than plastic
- Counter-current recirculating a solution at 42° C providing an effective and stable heating.

### Easy To Use

- · Disposables are easy to insert and remove
- Gas vent/Filter Assembly can be changed without replacing the entire disposable
- Durable surface makes it easy to clean
- Roller wheels on base make it easy to transport within your facility.
