

The P90 not only prints fast, but thanks to its USB 2.0 connection, your pictures are sent to the printer at lightning speed. This is because, particularly in the area of medical documentation, quality control or surveillance services, there are more important things to do than wait for the printout. A truly highly developed technology however, offers not just rapidity but extreme ease of use too.

The comfortable adjustment possibilities make the P90 your personal assistant. You have the choice between 7 different picture formats and can insert texts of up to 40 characters or a date & time stamp. When printing more than one picture you save paper as the space between the individual pictures can be reduced (paper save function).

Also, with the adjustment of your P90 is easy, the lock function enabled you to protect your individual settings for as long as you want.
