

The **Philips ATOM V-2200** is an advanced closed-type infant incubator designed to provide an optimum clinical environment for newborn and premature neonates. The V-2200 is also designed to offer the clinical staff optimum conditions for observation and examination, temperature stabilization and management, and post-operative care of their small patients. It incorporates the thermoregulatory ability to adjust the baby's skin temperature.

Features

- Powered height adjustment.
- 4 Snap-open access ports.
- Optional oxygen controller, pulse oximeter, and weight monitor.
