

Philips Bispectral Index (BIS) measurement uses Aspect Medical Systems' XP platform technology. It provides depth of consciousness and sedation monitoring for use in the OR, ICU, and other clinical settings.

Features

- Regulates anesthetic drug use
 - Decreases the incidence of post-operative side effects such as nausea and vomiting
 - Reduces length of stay in the PACU (recovery room)
 - Prevents intraoperative awareness
 - Greater awareness of patient-specific reaction to anesthesia and sedation
 - BISx power link works with a range of sensors
