

The **SciCan STATIM 5000** autoclave is designed to provide a complete sterilization solution for unwrapped and wrapped instruments. The STATIM 5000 provides rapid sterilization balanced with rapid drying. The heat from the sterilization process is absorbed by unique drying plates located in the sterilization chamber. It's then transferred from the drying plates to the instruments utilizing radiant heat.

Features

- Sterilizes handpieces and instruments for immediate use in as little as 9 minutes.
- Thin stainless steel walls of the STATIM's fully-removable cassette, allow for rapid heating and cooling of the chamber.
- Uses radiant heat to dry instruments by utilizing the remaining heat in the system after a sterilization process.
- Has an integrated internal printer.
