

The IMAGE 1 HUB HD constitutes the backbone of the KARL STORZ FULL HD Imaging System. With 1,920 x 1,080 resolution and progressive scan, the camera control unit (CCU) guarantees a lag-free image and natural color reproduction. The unique combination of ease-of-use and excellent image quality ensures time-efficiency and maximum patient safety, marking a new milestone in the evolution of endoscopic imaging.

IMAGE 1 offers documentation and printing functions as integrated modules. The CCU's front and rear USB ports allow for the simultaneous connection of various printers and USB mass storage devices.

All IMAGE 1 Camera Heads, regardless of whether they are FULL HD, standard definition, or designed for video endoscopy, can be used with a single IMAGE 1 HUB™ CCU. The KARL STORZ philosophy aims at long-term, future-oriented partnerships with our customers.

## Features

- HD Camera Hub
- Camera Head
- SDI Video Cable
- DVI Video Cable
- Medical Grade Universal Power Cable
