

The **Stryker System 6** is a powerful surgical power tool that provides exceptional speed, versatility, and performance in its instruments. The sagittal saw has a two-speed control, that allows for a wide range of cutting options. The reciprocating saw is small and has better ergonomics. The sternum saw has increased cutting speed for a more aggressive cut. The rotary hand pieces allow for both high-speed drilling and high-torque reaming.

Features

- Advanced motor technology.
- Reduced vibration and enhanced hand piece control.
- Two-speed control.
- Ergonomic handling.
- Increased cutting speed.
- High-speed drilling and high-torque reaming.
- Single and dual-trigger options.
- Battery charger.
- Modular sterilization containers.
