

The **Stryker TPS (Total Performance System)** is intended for the use in cutting, drilling, decorticating, and smoothing of bone and other bone related tissue in a variety of surgical procedures. The Stryker TPS allows the user to select functions and setting such as handpiece selection, speed, and direction. The Console is designed to be easy to use, and understand and the touch-sensitive control screen allows you to set the system controls with the touch of a finger. The Control screen also provides important monitoring information for the selected handpiece.

## Features

- TPS Console with integral irrigation pump and TPS footswitch.
- TPS 12k Shaver.
- TPS Sagittal Saw.
- TPS Universal Driver.
- Many different attachments for saw and drill.
- Touchscreen.
