

TKR positioners are surgical table accessories that clamp on the rails of your table to hold the operative leg in extension, flexion, tilt, or rotated positions while assisting in total knee replacement surgeries. Components of these TKR positioning systems are autoclavable and the smooth sliding allows for effortless leg positioning.

Features

- All components can be sterilized in an autoclave.
- Sturdy and reliable intraoperative positioning.
- Available in 30" and 24" track systems.
- Full range of articulation.
