

The **Bear Cub 750 PSV** is an infant ventilator that can accommodate patients that weigh from 1 pound (500 grams) to 66 pounds (30 kg). The Bear Cub was designed to support critical care of neonatal and pediatric patients with compromised lung function. The System offers integrated synchronized ventilation along with pressure, flow, and volume monitoring. The Bear Cub offers three different ventilation modes from assisted control, SIMV/IMV, and CPAP.

Features

- Pneumatic Ventilator
- Gas Inlet Conditioning
- Accurate blending of gases in the O2 blender
- Flow Control Valve
- Auxiliary Gas Outlet
- Pressure Control System
- Flow Sensor
