

# STRYKER SYSTEM 8

## ABOUT

---

The Stryker System 8 Power Tools are advanced surgical instruments designed for precision and efficiency in orthopedic procedures.

## FEATURES

---

- The System 8 Power Tools offer a modular system, allowing surgeons to easily switch between different attachments such as drills, saws, reamers, and drivers.
- A wide range of attachments is available. These power tools support various surgical procedures, including bone cutting, drilling, and screw insertion.
- Designed for comfortable handling, reducing surgeon fatigue during lengthy procedures, and ensuring precise control.
- Consistent and reliable performance, powered by high-quality motors capable of handling demanding surgical tasks.
- Some models feature advanced control systems with variable speed and torque settings, along with intuitive interfaces for easy operation and customization.

# SPECIFICATIONS

## SAG (SAGITTAL) SAW

---

Height: 6.1" (15.5 cm)  
Width: 1.5" (3.8 cm)  
Length: 6.7" (17.0 cm)  
Weight: 2.2 lb (1.0 kg)  
Speed: 12000 cpm (fast mode), 10000 cpm (standard mode)  
Excursion: 5-degree arc

## CORDLESS DRIVER

---

Height: 5.5" (14 cm)  
Width: 1.3" (3.4 cm)  
Length: 4.2" (11 cm)  
Weight: 1.3 lbs  
Maximum Speed: 1500 rpm (nominal)  
Mode of Operation: Non-continuous

## PRECISION SAW

---

Height: 5.9" (15.0 cm)  
Width: 1.4" (3.6 cm)  
Length: 7.0" (17.8 cm)  
Weight: 2.4 lb (1.09 kg)  
Maximum Speed: 16000 cpm (fast mode)  
Excursion: 12-degree arc

## STERNUM SAW

---

Height: 5.9" (15.0 cm)  
Width: 1.4" (3.6 cm)  
Length: 7.2" (18.4 cm)  
Weight: 2.2 lb (1.0 kg)  
Maximum Speed: 14000 cpm (fast mode)
