Patient Warmer

STRYKER MISTRAL-AIR MODEL 1200

ABOUT

The **Stryker Mistral-Air 1200** is a device designed to keep patients warm by using low-pressure blankets that spread warm air evenly over the patient's surface. It features an integrated HEPA filter that effectively captures 99.99% of particles as small as 0.3 microns. The Mistral-Air operates quietly yet delivers a high volume of air, and it is equipped with alarms to signal both over and under-temperature conditions.

FEATURES

Even air diffusion that avoids individual high-pressure air jets that might shift the blanket.

Comes with a built-in HEPA filter.

Starts at a default temperature of 100.4°F.

Offers three different heat settings.
