Functional Medical Headwalls

AXIA FH-2000

ABOUT

The **Axia FH-2000** functional headwall is a versatile and efficient solution for patient care settings, designed for easy installation and maintenance. Its customizable configuration allows healthcare facilities to adapt it to various environments, including patient rooms, ICU, NICU, PACU, trauma, and L-D-R. The Axia FH-2000 comes pre-piped and wired to streamline setup and features essential utilities, including a nurse call system, multiple electrical outlets, and DISS gas outlets for oxygen, medical air, and vacuum. Its compact design optimizes space while maintaining functionality. The surface-mounted structure ensures durability, providing reliable support for medical equipment and supplies.
