Anesthesia Vaporizers

# DRAGER VAPOR 3000 SEVOFLURANE

## ABOUT

The **Drager Vapor 3000 Sevoflurane** is an sevoflurane-specific **anesthesia vaporizer** that delivers precise agent dosing with maximum safety and usability. It is designed for modern OR settings and integrates advanced safety features, intuitive operation, and seamless compatibility with Dräger workstations.

## FEATURES

- **Agent Delivery:** Supports consistent and accurate delivery of sevoflurane from 0.2 to 8 vol%.
- **Sevoflurane-Specific Design:** Engineered exclusively for use with isoflurane to ensure optimal performance and safety.
- **Fill System:** Equipped with keyed filling to prevent cross-contamination and incorrect agent filling.
- **Alert System:** Includes backlit indicators and low-level alarms to notify clinicians during critical use.
- **No Power Required:** Operates entirely without batteries or external power, using the pressure from fresh gas flow for reliable and maintenance-free performance.
- **No Recalibration Required:** Factory-calibrated for lifetime accuracy, eliminating the need for service-based recalibration.
- **Mounting Compatibility:** Designed for use with Perseus A500 and Dräger Auto Exclusion mounting systems for streamlined workflow.

# SPECIFICATIONS

## DIMENSIONS

**Length:** 9.8 in (248 mm)

**Width:** 4.4 in (112 mm)

**Height:** 9.7 in (247 mm)

**Weight:** 14.1 lb (6.4 kg)

## ANAESTHETIC AGENT

**Isoflurane**

**Dosage Range:** 0.2 to 8 vol%

**Filling Volume**

- Total: 360 mL
- Refill: 260 mL

**Flow Range:**

- 0.15 to 15 L/min

## GENERAL

**MRI Compatible:** No

**Certifications:** CE-Marked

**Transportation Capability:** Yes

**Operating Temp**

- min: 18 °C
- max: 30 °C
